MAP GUIDELINES:

MAP TYPES	3
MAP ELEMENTS	3
MAP KEY	4

MAP DETAILS:

PROLOGUE 5

MISSION 0-A: CLOAK AND DAGGER 5

Combat 0-A1: Scar Tissue 5

Combat 0-A2: Pants on Fire 5

MISSION 0-U: PLAGUESHIP 5

Combat 0-U1: Freeloaders 5

Combat 0-U2: 99.9% of Germs 5

ACT 1 6

MISSION 1: FALL OF ICARUS 6

Combat 1-1: Extreme Commuting 6

Combat 1-2: Dragon's Den 6

Combat 1-3: Pressure Cooker 6

Combat: 1-4: Hammer and Anvil 6

MAP GUIDELINES

This document offers guidance for the usage of the tactical battlemaps included in the *Pass the Torch* demo.

MAP TYPES

All maps come in three types: zoned, gridded, and gridless.

ZONED

These maps include colored zones that detail objects, soft cover, difficult terrain, dangerous terrain, Control Zones, Extraction Zones, Deployment Zones, and so on.

GRIDDED

The gridded maps come with a square tactical grid overlay. It does not include zones.

This may be helpful for GMs who intend to draw their own zones, including Foundry's *Terrain Height Tool* module, or those who want to avoid visual clutter.

GRIDLESS

Gridless maps lack any marking and indicators. These may be adapted for use with hex-grids, as described in the next section.

SQUARES VS. HEXES

Despite the common misconception, *Lancer* can be played with either a square or a hex grid. It can even be played with neither, using distances or theater of the mind. *Pass the Torch*'s maps were designed to be used with a square grid.

This is due to the use of the Dungeondraft tool which does not natively support the creation of hex-based maps. In the author's opinion, it is also easier to depict and outline boxy structures and interiors on a squared grid than with hexes.

Regardless, a GM may still use the battlemaps with hexes by overlaying each gridless map with a hex-grid. Be warned that objects, structures, and zones will not be perfectly aligned when using hexes; some off-center objects and adjusting of zones should be expected.

REAPPROPRIATING MAPS

The battlemaps designed for the *Pass the Torch* campaign may be freely reappropriated for personal use in your *Lancer* campaigns, or in other tabletop systems. The gridded and gridless maps are recommended for this purpose.

However, these maps cannot be reappropriated for commercial use.

MAP ELEMENTS

Common elements found across the battlemaps include uneven objects, walls, and ledges.

UNEVEN OBJECTS

Most objects follow the rules of the **Objects and Damage** section of the *Lancer Core Rulebook* (pg 68). However, not all objects in the maps are match their **SIZE** on each side.

Some **SIZE 1** objects may be **2 or 3 spaces long**, while some **SIZE 2** objects may be **10 spaces high**, and so on. While these objects may have specific statistics and mechanics (such as damaging a pillar to make it fall in a certain direction) in certain scenes, many will not.

For these objects, it's recommended the GM give them **+5 HP** over the object's usual amount, depending on its footprint. For example, an object that is **2 spaces high** but only takes up **1 space** on the ground would have **15 HP**. Alternatively, if the PCs desire it, they could target and destroy **SIZE 1** sections of an object, each of which have **10 HP**.

WALLS

A wall is any long object that does not occupy a whole space. Instead, it is situated between spaces. Whenever a wall appears in a map, its **SIZE** (height) will be described in that scene's section of this document.

Walls may be destroyed by any **melee or ranged attack** capable of targeting an adjacent space that the wall is facing. Attacks that don't make an area pattern can only target the wall adjacent to a space or another target in the space, not both.

Each section of wall has **10 HP**, and may have **ARMOR** if the GM decides it should. When a character deals enough damage to destroy a section of wall, it may make a hole equal to the character's **SIZE**. I.e., a **SIZE 2** character may break a hole in a wall that is **2 spaces wide** and **2 spaces high**.

LEDGES

Many maps will have ledges to create height differentials across the terrain. Visual cues are used to help the GM differentiate between higher and lower areas. Ledge heights are detailed in the scene's section for each map in this document.

As a rule of thumb, most ledges throughout the campaign are **2 spaces high**. This is high enough to break line of sight for **SIZE 1** mechs and provide good cover for **SIZE 2** mechs. It is not so high as to cause falling damage to mechs jumping down from the top.

MAP KEY

	ZONE	NOTES
	Object	The number in the zone details the height of the object.
	Soft Cover	The number in the zone details the height of the soft cover.
	Difficult Terrain	See the rules for difficult terrain in the <i>Lancer Core Rulebook</i> (pg 62).
	Dangerous Terrain	See the rules for dangerous terrain in the <i>Lancer Core Rulebook</i> (pg 62).
	Objective	This includes demolition objectives for the Demolition sitrep. Objectives may also include a number for their Size .
	Interactive / Special	Specific rules for each interactive/special object or space are detailed within the combat scene. Interactive objects may also include a number for their Size .
	Allied Deployment Zone (ADZ)	-
	Enemy Deployment Zone (EDZ) / Ingress Zone (IZ)	-
	Extraction Zone (EZ) / Control Zone (CZ)	In Holdout sitrep scenes, the CZ is also the ADZ . In maps with dark backgrounds, a white coloration will be used instead.

NEGATIVE HEIGHT

A few specific zones are marked with negative numbers (e.g., -1 or -2). These areas are deeper than the surrounding area.

DEPLOYMENT ZONES

Characters that are larger than **Size 1** can be deployed in an **ADZ**, **EDZ**, or **IZ** so long as they are partially within the zone.

PROLOGUE: MAP DETAILS

MISSION 0-A: CLOAK AND DAGGER

COMBAT 0-A1: SCAR TISSUE

Size:

- **Width:** 26 cells
- **Height:** 32 cells

Resolution: 3328 x 4096 px

Grid Pixel Size: 128 x 128 px

DETAILS

Ledges: The western and eastern valley cliffs are **8 spaces high**.

COMBAT 0-A2: PANTS ON FIRE

Size:

- **Width:** 35 cells
- **Height:** 25 cells

Resolution: 4480 x 3200 px

Grid Pixel Size: 128 x 128 px

DETAILS

Buildings: All buildings are **2 spaces high**.

Ledges: The northern and southern valley cliffs are **8 spaces high**.

Walls: The western walls are **2 spaces high**.

MISSION 0-U: PLAGUESHIP

COMBAT 0-U1: FREELoadERS

Size:

- **Width:** 25 cells
- **Height:** 25 cells

Resolution: 3200 x 3200 px

Grid Pixel Size: 128 x 128 px

DETAILS

Ceiling: The ceiling of the map is **6 spaces above** the central docking zone.

Ledges: The northern and southern areas, along with the metal catwalks connecting the two, are **2 spaces high**.

Space: At the GM's discretion, characters thrown out the eastern atmosphere barrier are removed from the battlemat. They can re-deploy onto the map at the end of their next turn.

COMBAT 0-U2: 99.9% OF GERMS

Size:

- **Width:** 25 cells
- **Height:** 20 cells

Resolution: 3200 x 2560 px

Grid Pixel Size: 128 x 128 px

DETAILS

Ceiling: The ceiling of the map is **6 spaces above** the floor.

Ledges: The central platform (grey metal) is **1 space high**. The central tower (lit grating) is **3 spaces higher** than the floor, or **2 spaces higher** than the platform.

The northwest and southeast corners are **2 spaces high**.

ACT 1: MAP DETAILS

MISSION 1: FALL OF ICARUS

COMBAT 1-1: EXTREME COMMUTING

Size:

- **Width:** 33 cells
- **Height:** 20 cells

Resolution: 4224 x 2560 px

Grid Pixel Size: 128 x 128 px

DETAILS

Buildings: The western and eastern factories are **10 spaces high**.

Molten Metal: The molten canals are **1 space deeper** than the platforms.

COMBAT 1-2: DRAGON'S DEN

Size:

- **Width:** 24 cells
- **Height:** 24 cells

Resolution: 3072 x 3072 px

Grid Pixel Size: 128 x 128 px

DETAILS

Ceiling: The ceiling is **6 spaces above** the floor.

Conveyors: The yellow arrows show the direction each conveyor belt moves. The blue conveyor belts are elevated **1 space higher** than the yellow conveyor belts. **Size 1** or smaller characters may pass underneath the elevated conveyor belts.

Molten Metal: The molten pools are **1 space deeper** than the floor.

Ledges: The central platform (grey grating) is **1 space higher** than the floor.

COMBAT 1-3: PRESSURE COOKER

Size:

- **Width:** 22 cells
- **Height:** 33 cells

Resolution: 2816 x 4224 px

Grid Pixel Size: 128 x 128 px

DETAILS

Molten Metal: The molten canals are **1 space deeper** than the platforms.

Ledges: Two ledges (lined with fans) separate each third of the map. Each ledge is **2 spaces high**, so that the top third of the map is **4 spaces higher** than the bottom third of the map.

The enormous molten tank at the northern edge of the map is **20 spaces high**.

COMBAT 1-4: HAMMER AND ANVIL

Size:

- **Width:** 30 cells
- **Height:** 20 cells

Resolution: 3840 x 2560 px

Grid Pixel Size: 128 x 128 px

DETAILS

Molten Metal: The molten canals are **1 space deeper** than the platforms.
